Day 6

7

Day 7

Your 7-Day Legacy Plan

Prepared for Nermeen Nasim · AT RISK

DAY 01

Legal Readiness

Identify Primary, Secondary, Tertiary for Executor and ask the primary if they are willing to manage your affairs after you are gone

88% of Executors were never asked. Court-appointed administrators cost estates 6-18 months and thousands of dollars.

How: Write 3 names: Primary, Secondary, Tertiary. Text the Primary: 'Would you be willing to be my Executor? It means handling my estate. I would like to talk about what is involved.'

Day 1 is done. Tomorrow moves to your second weakest domain.

DAY 02

Financial Readiness

Verify beneficiaries on one retirement account and one insurance policy

Outdated beneficiaries are the #1 estate planning mistake. They override the Will entirely. Do not let your ex-spouse inherit by default.

How: Log into one retirement account (401k, IRA). Check beneficiary page. Update or confirm. Repeat for one insurance policy.

Two days in, streak is live. Tomorrow is the halfway lean-in.

DAY 03

Physical Readiness

Decide burial vs cremation. Write it. Tell someone you know/love/trust.

This is the decision your family dreads most in the first 72 hours. Documented wishes take precedence over family preference in most states.

How: Pick burial, cremation, aquamation, green burial, or body donation. Write: 'I want [choice] at [funeral home].' Sign. Date. Store with Will.

Halfway there. Tomorrow you touch your fourth and final domain.

Your 7-Day Legacy Plan

Prepared for Nermeen Nasim · AT RISK

DAY 04

Digital Readiness

Set up Legacy Contact on your phone (iPhone or Android)

\$600B in digital assets lost annually because nobody can unlock the phone.

How: iPhone: Settings -> Apple ID -> Sign-In & Security -> Add Legacy Contact. Android: Google Inactive Account Manager. Add primary + secondary + tertiary.

Every domain has now been touched. Tomorrow we return to your weakest for a second, deeper action.

DAY 05

Legal Readiness

Status-check your estate documents: exists / outdated / does not exist

76% of people die without any estate documents. State intestacy law then decides who gets what, rarely matching what you wanted.

How: One of three: (1) if you have one, text your Executor the location of this document. (2) If outdated, review to determine if it needs to be updated. (3) If none, write ONE sentence: 'If I died tomorrow, I would want ____.' Visit www.freewill.com to learn more about what you need.

Back to the hardest domain. One more day before consolidation.

DAY 06

Financial Readiness

List your 5 most important financial accounts (include the institution + point of contact)

67% of families struggle to find accounts after death. \$70B sits unclaimed in the US as we speak.

How: Create a hard-copy document. Write: institution name, account type, last 4 digits, beneficiary. 5 accounts.

Six days down. Tomorrow is consolidation and your next step.

Your 7-Day Legacy Plan

DAY 07

Consolidate & Commit

Tell your Know/Love/Trust person where every list from this week lives. Then book your next step.

You just completed 7 actions in 7 days. 96% of people who say they will plan never start. You did.

How: Send one message to your KLT person with: location of each doc, password manager access plan, Executor choices, disposition decision. Then book a 1:1 with Niki OR enroll in the 7-Week Sprint.

Nermeen Nasim, seven days ago you were at risk. You just completed 7 actions in 7 days. That is what readiness starts to look like. Your next step: book a 1:1 with Niki to lock in what you have built.

MY NOTES

Use this space to capture your thoughts, priorities, or reminders as you work through your plan.
